Subject Index*

A

Abscesses, indium-111–labeled leukocytes for localization of, compared to gallium-67 citrate in dogs, 217

Acetazolamide, effects on renal excretion of phosphate in hypoparathyroidism and pseudohypoparathyroidism, 1188

Acetone-fixed lymphocytes, indirect immunofluorescence on, for detecting antilymphocyte antibodies in systemic lupus erythematosus, 240

Acid loads, ammonium excretion in response to, effect of metabolic alkalosis and cation depletion on, 1251

Acrylonitrile co-polymer dialysis membranes, role of heparin in platelet retention by, 724

Actinomycetes, thermophilic, antibodies against, in hypersensitivity pneumonitis, indirect immunofluorescent detection of, 533

Activation of complement components C3 and factor B in synovial fluids, 160

Activator and proactivator levels of plasminogen in plasma as measured by caseinolysis, 1153

Acyltransferase, lecithin:cholesterol, plasma, activated during alimentary lipemia, 524

Adenylate energy charge of liver in diabetic rats, effect of subcutaneous vs. intraportal insulin administration, 937

Adrenal hyperplasia, congenital, false elevation of plasma cortisol in, 735

Agarose gel, albumin-conjugated, hemoperfusion through, for treating neonatal jaundice in premature rhesus monkeys, 101

electrophoresis for automated microdensitometry and quantification of lipoproteins, 1341

Aggregation, platelet responsiveness to, collagen or epinephrine potentiation of, 603

AHF; *see* Factor VIII

Albumin-agarose gel, hemoperfusion through, elimination of platelet and white blood cell losses in, by calcium chelating agents and prostaglandin E_1, 110

-conjugated agarose gel, hemoperfusion through, for treating neonatal jaundice in premature rhesus monkeys, 101

excretion by kidney, effect of volume expansion on, 25

fatty acid binding to, influence of fatty acids on, 295

Alkaline phosphatase, alterations in, from variation in dietary protein content in rat, 72

Alkalosis, metabolic, and cation depletion, effect on ammonium excretion in response to acid loads, 1251

Alloxan-diabetic dogs, insulin-deprived, gastric glucagon hypersecretion in, 971

Alteration of effectiveness of antibiotics by anaerobiosis, 65

in enterokinase, trypsin, and alkaline phosphatase from variation in dietary protein content in rat, 72

Alternate-day corticosteroid administration, vs. daily, effect on bone growth, 120

Alveolar macrophages, human pulmonary, mediating lymphoproliferative responses to antigens, 1326

system, influence of acute exposure to cigarette smoke on, 1215

Aminoglycoside antibiotics, comparison of four, in therapy of experimental *E. coli* meningitis, 692

Ammonium excretion in response to acid loads, effect of metabolic alkalosis and cation depletion on, 1251

Amphotericin B, effect on urine acidification in rats as pathogenesis of distal renal tubular acidosis, 463

Amyloidosis, secondary, serum component related to, immunochemical studies on, 1092

Anaerobiosis altering effectiveness of antibiotics, 65

Anemia, sickle cell, red cell calcium content and transmembrane calcium movements in, 1365

Angiographic assessment of arterial cholesterol content and gross pathology in human atherosclerosis, computer densitometry for, 378

Antibiotics, alteration of effectiveness of, by anaerobiosis, 65

aminoglycoside, comparison of four, in therapy of experimental *E. coli* meningitis, 692

Antibodies, antilymphocyte, in patients with systemic lupus erythematosus, detected by indirect immunofluorescence on acetone-fixed lymphocytes, 240

antiplatelet, in platelet factor 3 immunoinjury, detected in immunologic, drug-induced, and neonatal thrombocytopenias, 400

antitumor, in human breast cancer sera, detected by fixed cell and living cell immunofluorescence assays, 257

cytotoxic, to erythroblasts, 851

to hepatitis B surface antigen, nonspecific test reactions in chronic HBsAg carriers, 428

against *Pseudomonas aeruginosa*, specific, extraction and purification by immune affinity chromatography, 433

against thermophilic actinomycetes in hypersensitivity pneumonitis, indirect immunofluorescent detection of, 533

Antigens, lymphoproliferative responses to, mediated by human pulmonary alveolar macrophages, 1326

plasma cell, in human multiple myeloma, 1009

urinary, fibrin-fibrinogen–related, origin in glomerulonephritis, 1043

Antihemophilic factor; see Factor VIII

Antilymphocyte antibodies, detection in patients with systemic lupus erythematosus by indirect immunofluorescence on acetone-fixed lymphocytes, 240

Anti-M streptococcal sera, type-specific, prepared by immunization with acid-hydrolyzed cells, 1120

Antiplatelet antibody in platelet factor 3 immunoinjury, detected in immunologic, drug-induced, and neonatal thrombocytopenias, 400

Antitumor antibodies in human breast cancer sera, detected by fixed cell and living cell immunofluorescence assays, 257

chemotherapy with 1,3-bis(chloroethyl)-1-nitrosourea, severe generalized glutathione reductase deficiency after, 1080

9-β-D-Arabinofuranosyladenine and hypoxanthine derivative, inhibitory and lethal concentrations against herpes simplex virus, type 1, 687

Arginase deficiency (hyperargininemia), simple screening test for, 876

January, pp. 1-228; February, pp. 229-454; March, pp. 455-686; April, pp. 687-918; May, pp. 919-1158; June, pp. 1159-1148.

Arginine esterase, normal plasma, and factor XII–prekallikrein-kininogen system in cystic fibrosis, 131
Asialofibrinogen, human, functional and metabolic properties of, 367
Atherosclerosis, human, computer densitometry for angiographic assessment of arterial cholesterol content and gross pathology in, 378
Autologous ^{131}I-fibrinogen in dog, labeled by chloramine-T method, physiologic and biologic behavior of, 1105
Automated microdensitometry and quantification of lipoproteins by agarose gel electrophoresis, 1341

B

Bacterial endotoxin, in vivo and in vitro effect on erythroid precursors (CFU-E and ERC) in bone marrow of mice, 278
BAGPM (new liquid medium), blood stored in, maintenance of low screen filtration pressure in, 504
BCNU; *see* 1,3-bis(Chloroethyl)-1-nitrosourea
Bile duct obstruction, chronic, renal dilatation in blunted natriuresis of saline infusion of dogs with, 1053
  salt-nondependent fraction of canalicular bile water, assessment in rat, 393
Bilirubin binding to albumin, influence of fatty acids on, 295
  capacity, reserve, simplified micromethod for assay of, 439
Bleeding time, in vitro measurement of, 1306
Blood lactate increases, cyanide-induced, interaction with ethyl methylene blue, 632
  liquid storage of, prolonged maintenance of 2,3-DPG in, by internal CO_2 trap to stabilize pH, 498
  stored in new liquid medium (BAGPM), maintenance of low screen filtration pressure in, 504
  uroporphyrinogen III cosynthetase in, in Dubin-Johnson syndrome, 517
  whole, kinetics of cyanate-hemoglobin reaction in, 978
  zinc protoporphyrin level in, determined by portable hematofluorometer as screening device for lead poisoning, 712
Bone growth, effect of daily vs. alternate-day corticosteroid administration, 120
  marrow cells of normal infants, predominance of lymphocytes in, 1225
  mouse, colony-forming cells from, dissimilarity of in vitro and erythrocyte-enhanced, 829
  effect of bacterial endotoxin on erythroid precursors (CFU-E and ERC) of, 278
  regeneration in osteosclerotic mouse, trauma as stimulus to, 804
  matrix, effect on young connective tissue cells in culture, 781
Breast cancer sera, human, antitumor antibodies in, detected by fixed cell and living cell immunofluorescence assays, 257
Brushite and calcium oxalate saturation in urine, comparison of three methods for estimating, 891
Burn, infected, myelopoiesis in, 540

C

^{14}C cyanate as tag for red cell survival in normal and uremic man, 823
C3: *see* Complement components C3 and factor B
Calcium chelating agents and prostaglandin E_1 for eliminating platelet and white blood cell losses from hemoperfusion through uncoated charcoal, albumin-agarose gel, and neutral and cation exchange resins, 110
Calcium—Cont'd
  content of red cell and transmembrane calcium movements in sickle cell anemia, 1365
  gluconate infusion, effect on renin in dog, 181
  movements, transmembrane, in sickle cell anemia, 1367
  oxalate and brushite saturation in urine, comparison of three methods for estimating, 891
  pyrophosphate dihydrate crystal–induced chemotactic factor, subcellular localization, role of protein synthesis, and phagocytosis, 817
    monosodium urate monohydrate, and silicon dioxide crystals, protein binding to. I. Physical characteristics, 1314
Canalicular bile water, bile salt–nondependent fraction of, assessment in rat, 393
  formation in isolated perfused rat liver, effect of *E. coli* endotoxin on, 471
Canine; *see* Dog
Cardiac output, decreased, not stimulating sodium retention during acute constriction of vena cava, 809
Caseinolysis, proactivator and activator levels of plasminogen in plasma as measured by, 1153
Catabolism of β_2-microglobulin in rat, 1208
Catalase, human erythrocyte, L-Dopa peroxidase activity of, 763
Catecholamines, plasma, improved fluorimetric assay vs. enzymatic method, 421
Cation depletion and metabolic alkalosis, effect on ammonium excretion in response to acid loads, 1251
Cells, acid-hydrolyzed, immunization with, for preparing type-specific anti-M streptococcal sera, 1120
  connective tissue, young, effect of bone matrix on, in culture, 781
  -directed inhibitor of leukotaxis in human serum, 190
  mononuclear, human, tissue factor generation by, effects of endotoxin on and dissociation from mitogenic response, 792
Cephalosporin antibiotics, human serum protein binding of, 414
Cerebrospinal fluid, human, quantitative relationships of fourth complement component in, 615
Ceroid-lipofuscinosis, neuronal, leukocyte peroxidase deficiency in Jansky-Bielschowsky type, 770
CFJ-E; *see* Erythroid precursors
Charcoal, uncoated, hemoperfusion through, elimination of platelet and white blood cell losses in, by calcium chelating agents and prostaglandin E_1, 110
Chemiluminescence of granulocytes, effect of sodium azide on, providing evidence for generation of multiple oxygen radicals, 1333
  response, compared to phagocytic response, to human polymorphonuclear neutrophils, 153
Chemotactic factor, calcium pyrophosphate dihydrate crystal–induced, subcellular localization, role of protein synthesis, and phagocytosis, 817
Chemotherapeutic agents, sensitivity of clinical isolates of *Mycobacterium tuberculosis* to, rapid radiometric method for determining, 861
Chloramine-T method, autologous ^{131}I-fibrinogen labeled by, in dog, physiologic and biologic behavior of, 1105
  radioiodination, modified, compared with iodine monochloride for in vivo protein studies, 836
1,3-bis(Chloroethyl)-1-nitrosourea as antitumor chemotherapy, severe generalized glutathione reductase deficiency after, 1080

Cholesterol content, arterial, in human atherosclerosis, computer densitometry for angiographic assessment of, 378
-phospholipid composition, abnormalities of, in platelets and low-density lipoproteins of human hyperbetalipoproteinemia, 341
Chromatography, immune affinity, for extraction and purification of specific antibody against *Pseudomonas aeruginosa*, 433
Chronic HBsAg carriers, nonspecific test reactions for antibodies to hepatitis B surface antigen in, 428
Cigarette smoke, acute exposure to, influence on alveolar macrophage system, 1215
Cirrhosis, relationship of systemic and intrarenal hemodynamics in, 1175
Clofibrate, colestipol, and phytosterols in combined therapy of hyperlipidemia, 354
CO_2 trap, internal, used to stabilize pH for prolonged maintenance of 2,3-DPG in liquid blood storage, 498
Coagulant activity molecule, factor VIII, and ristocetin-Willebrand factor, interaction between, 1295
Coagulopathy, heparin-induced, 741
Colestipol, clofibrate, and phytosterols in combined therapy of hyperlipidemia, 354
Collagen or epinephrine potentiation of platelet responsiveness to aggregation, 603
Collagenase, granulocyte, human, interaction with plasma protease inhibitors, 269
Colony-forming cells from mouse marrow, in vitro and erythrocyte-enhanced, dissimilarity of, 829
Colorimetric assay for interferon, quantitative semimicro, semiautomated, 1036
Complement-activation and rabbit pyrogen assays for endotoxins correlated with *Limulus* lysate for biological activities of tritiated endotoxins, 308
components C3 and factor B, activation in synovial fluids, 160
breakdown products of, in hemolytic-uremic syndrome, 845
fourth component of, quantitative relationships in human cerebrospinal fluid, 615
Computer densitometry for angiographic assessment of arterial cholesterol content and gross pathology in human atherosclerosis, 378
Congenital adrenal hyperplasia, false elevation of plasma cortisol in, 735
Connective tissue cells, young, effect of bone matrix on, 781
Contraceptive drugs, oral, fibrin formation and dissolution in women receiving, 751
Corticosteroid, daily vs. alternate-day administration of, effect on bone growth, 120
Cortisol, plasma, false elevation in congenital adrenal hyperplasia, 735
Cosynthetase, uroporphyrinogen III, in liver and blood in Dubin-Johnson syndrome, 517
Cryoglobulinemia in Sjögren's syndrome and factors of cryoprecipitation, 483
Cryoprecipitation, factors of, and cryoglobulinemia in Sjögren's syndrome, 483
Crystallization, stroma-free hemoglobin prepared by, characteristics of, 509
Cyanate-hemoglobin reaction in whole blood, kinetics of, 978
inhibiting hemoglobin S polymerization, mechanism of, 992
Cyanide-induced increases in blood lactate, interaction with ethyl methylene blue, 632
Cystic fibrosis, normal plasma arginine esterase and factor XII–prekallikrein-kininogen system in, 131
Cytotoxic antibody to erythroblasts, 851

D

Daily corticosteroid administration vs. alternate-day, effect on bone growth, 120
Densitometry, computer, for angiographic assessment of arterial cholesterol content and gross pathology in human atherosclerosis, 378
Diabetic and nondiabetic kidneys, human, size and weight of glomeruli from, 544
rats, effect of subcutaneous vs. intraportal insulin administration on adenylate energy charge of liver, 937
Dialysis membranes, acrylonitrile co-polymer, role of heparin in platelet retention by, 724
Diarrheal stools, reovirus-like agent in, reliable indentification of, 560
Dietary protein content in rat, alterations in enterokinase, trypsin, and alkaline phosphatase from variations in, 72
Diether phospholipid, synthetic, effect on lipid absorption in rat, 147
1,25-Dihydroxycholecalciferol production in rats, effect of decreased renal function with and without reduction in renal mass, 1168
Dogs, alloxan-diabetic and insulin-deprived, gastric glucagon hypersecretion in, 971
with chronic bile duct obstruction, blunted natriuresis of saline infusion in, renal vasodilatation in, 1053
effect of calcium gluconate infusion on renin in, 181
localization of abscesses in, indium-111–labeled leukocytes compared to gallium-67 citrate for, 217
physiologic and biologic behavior of autologous ^{131}I-fibrinogen labeled by chloramine-T method in, 1105
L-Dopa peroxidase activity of human erythrocyte catalase, 763
2,3-DPG, prolonged maintenance of, in liquid blood storage by internal CO_2 trap to stabilize pH, 498
Dubin-Johnson syndrome, uroporphyrinogen III cosynthetase in liver and blood in, 517

E

E. coli endotoxin, effect on canalicular formation in isolated perfused rat liver, 471
meningitis, experimental, comparison of four aminoglycoside antibiotics in therapy of, 692
Electrolytes and water, muscle, in uremia and effects of hemodialysis, 322
Electrophoresis, agarose gel, for automated microdensitometry and quantification of lipoproteins, 1341
Emulsion, stable, validation of, for assay of lipoprotein lipase activity, 666
Endocarditis, *Staphylococcus aureus*, in rabbits, methicillin, nafcillin, and oxacillin compared in therapy of, 1262
Endogenous and exogenous hematopoietic repopulation after radiation injury, 229
Endotoxin, bacterial, in vivo and in vitro effect on erythroid precursors (CFU-E and ERC) in bone marrow of mice, 278
contamination in intravenous fluids, improved in vitro pyrogen test to detect picograms of using *Limulus* amoebocyte lysate, 910

Endotoxin—Cont'd
E. coli, effect on canalicular formation in isolated perfused rat liver, 471
effects on tissue factor generation by human mononuclear cells, 792
tritiated, biological activities of, correlation of *Limulus* lysate assay with rabbit pyrogen and complement-activation assays for endotoxin, 308
Enterokinase, alterations in, from variation in dietary protein content in rat, 72
Enzymatic method for plasma catecholamines vs. improved fluorimetric assay, 421
Enzyme activity, specific, problems of indirect immunologic assay of, 446
of purine metabolism, simple micro-assay methods for, 1135
Epinephrine or collagen potentiation of platelet responsiveness to aggregation, 603
ERC; *see* Erythroid precursors
Erythroblasts, cytotoxic antibody to, 851
Erythrocyte calcium content and transmembrane calcium movements in sickle cell anemia, 1365
catalase, human, L-Dopa peroxidase activity of, 763
decreased surface charge and accelerated senescence of, after neuraminidase treatment, 581
-enhanced vs. in vitro colony-forming cells from mouse marrow, dissimilarity of, 829
human, effects of methylprednisolone on physical properties of, 1241
normal human, effect of propranolol on, 41
introduction of hemoglobin S and C into, 30
protoporphyrin in, fluorometric assay for, as screening test for lead poisoning, 659
survival in normal and uremic man, ^{14}C cyanate as tag for, 823
zinc protoporphyrin, quantitative determination, 881
Erythroid precursors (CFU-E and ERC) in bone marrow of mice, effect of bacterial endotoxin on, 278
Erythropoietic inhibitory activity of plasma fractions from hypertransfused sheep, 93
Erythropoietin formation in fetus, liver as primary site of, 640
Estriol radioligand, directly iodinated, for radioimmunoassay of serum unconjugated estriol, 1125
serum, unconjugated, radioimmunoassay with directly iodinated estriol radioligand, 1125
Ethyl methylene blue, interaction with cyanide-induced increases in blood lactage, 632
Exchange resins, neutral and cation, hemoperfusion through, elimination of platelet and white blood cell losses in, by calcium chelating agents and prostaglandin E_1, 110
Exogenous and endogenous hematopoietic repopulation after radiation injury, 229
Extracellular fluid hyperoxia, depressant influence on liver slice oxygen uptake, 1269

F

Factor B; *see* Complement components C3 and factor B
Factor VIII coagulant activity molecule and ristocetin-Willebrand factor, interaction between, 1295
substructure of, 1159
XII–prekallikrein-kininogen system and normal plasma arginine esterase in cystic fibrosis, 131
Familial hyperchylomicronemia, oxyhemoglobin dissociation curve in, 573
Fast, brief, and protein-sparing diet, effect on nitrogen metabolism in mild obesity, 1030
Fatty acids, influence on binding of bilirubin to albumin, 295
Fetus, erythropoietin formation in, liver as primary site of, 640
Fibrin formation and dissolution in women receiving oral contraceptive drugs, 751
monomer measured with immune precipitate of fibrinogen, 653
-fibrinogen–related urinary antigen in glomerulonephritis, origin of, 1043
Fibrinogen catabolism in surgery patient and with postoperative venous thrombosis, correlation of findings by plasma fibrinogen chromatography and ^{125}I-labeled fibrinogen scan, 1349
immune precipitate of, for measuring fibrin monomer, 653
Fluorescence microscopy of 5-hydroxytryptamine organelles of blood platelets, mepacrine as tool for, 200
Fluorimetric assay, improved, for plasma catecholamines vs. enzymatic method, 421
of protoporphyrin in erythrocytes as screening test for lead poisoning, 659
Folate deficiency of intestinal mucosa, effect on jejunal transport in rat, 1002
Functional heterogeneity of transferrin-bound iron, in vivo evidence for, 51

G

Gallium-67 citrate compared with indium-111–labeled leukocytes for localization of abscesses in dogs, 217
Gastric glucagon hypersecretion in insulin-deprived alloxan-diabetic dogs, 971
Gentamicin and mercuric chloride, concomitant, effect on kidney function and structure in rat, 622
Glomerular basement membrane damage, glycoproteinuria as indicator of, 207
protein synthesis in proteinuric rats, 262
Glomeruli from human diabetic and nondiabetic kidneys, size and weight of, 544
Glomerulonephritis, urinary fibrin-fibrinogen–related antigen in, origin of, 1043
Glucagon, gastric, hypersecretion demonstrated in insulin-deprived alloxan-diabetic dogs, 971
Glucose-1-^{13}C, estimation of glucose turnover with, 285
metabolism, human monocyte, in lymphoma, 316
renal tubular reabsorption of, effect of phosphate depletion on, 554
turnover, estimation with stable tracer glucose-1-^{13}C, 285
Glutathione reductase deficiency, severe and generalized, after antitumor chemotherapy with 1,3-bis(chloroethyl)-1-nitrosourea, 1080
Glycoproteinuria as indicator of glomerular basement membrane damage, 207
Granulocytes, chemiluminescence of, effect of sodium azide on, providing evidence for generation of multiple oxygen radicals, 1333
collagenase, human, interaction with plasma protease inhibitors, 269
human, neutral proteases of, IV. Interaction between human granulocyte collagenase and plasma protease inhibitors, 269
Granulomatous diseases, patients with vs. normal persons, monocyte IgG receptor activity, dynamics, and modulation in, 332

H

Hageman factor; *see* Factor XII
Hamsters on lithogenic diet, hepatic 3-hydroxy-3-methylglutaryl CoA reductase activity in, 928

HBsAg; *see* Hepatitis B surface antigen
Hematofluorometer, portable, for determining zinc protoporphyrin level in blood as screening device for lead poisoning, 712
Hematopoietic repopulation after radiation injury, exogenous and endogenous patterns of, 229
Hemodialysis, effects of, and muscle water and electrolytes in uremia, 322
Hemodynamics, systemic and intrarenal, in cirrhosis, 1175
Hemoglobin C hemoglobinopathy, rheological evaluation of, 488
-cyanate reaction in whole blood, kinetics of, 978
S hemoglobinopathy, rheological evaluation of, 488
polymerization, mechanism of inhibition by cyanate, 992
S and C, introduction into normal red cells, 30
stroma-free, prepared by crystallization, characteristics of, 509
Hemoglobinopathies, hemoglobin S and hemoglobin C, rheological evaluation of, 488
Hemolytic-uremic syndrome, breakdown products of C3 and factor B in, 845
Hemoperfusion through albumin-conjugated agarose gel for treating neonatal jaundice in premature rhesus monkeys, 101
uncoated charcoal, albumin-agarose gel, and neutral and cation exchange resins, elimination of platelet and white blood cell losses from, by calcium chelating agents and prostaglandin E_1, 110
Hemopoietic stem cell dynamics in ^{89}Sr marrow-ablated mice, 592
Hemostasis in thermal injury, kinetics of, 702
Heparin-induced coagulopathy, 741
and platelet retention by acrylonitrile co-polymer dialysis membranes, 724
and streptokinase therapy evaluated by quantitative venographic assessment of deep vein thrombosis, 1018
Hepatic 3-hydroxy-3-methylglutaryl CoA reductase activity in hamsters on lithogenic diet, 928
Hepatitis B surface antigen, nonspecific test reactions for antibodies to, in chronic HBsAg carriers, 428
Herpes simplex virus, type 1, inhibitory and lethal concentrations of 9-β-D-arabinofuranosyladenine and hypoxanthine derivative, 687
Human asialofibrinogen, functional and metabolic properties of, 367
atherosclerosis, computer densitometry for angiographic assessment of arterial cholesterol content and gross pathology in, 378
cerebrospinal fluid, quantitative relationships of fourth complement component in, 615
diabetic and nondiabetic kidneys, size and weight of glomeruli from, 544
erythrocyte catalase, L-Dopa peroxidase activity of, 763
normal, effect of propranolol on, 41
granulocyte collagenase and plasma protease inhibitors, interactions of, 269
hyperbetalipoproteinemia, abnormalities of cholesterol-phospholipid composition in platelets and low-density lipoproteins in, 341
monocyte glucose metabolism in lymphoma, 316
mononuclear cells, tissue factor generation by, effects of endotoxin on and dissociation from mitogenic response, 792
multiple myeloma, plasma cell antigens in, 1009
polymorphonuclear leukocytes, re-evaluation of iodination by, 675
Human—Cont'd
and porcine ristocetin-Willebrand factor, purification of, 1278
pulmonary alveolar macrophages mediating lymphoproliferative responses to antigens, 1326
red cell, effects of methylprednisolone on physical properties of, 1241
serum protein binding of cephalosporin antibiotics in vitro, 414
16β-Hydroxydehydroepiandrosterone, interaction with renal mineralocorticoid receptors, 250
3-Hydroxy-3-methylglutaryl CoA reductase activity, hepatic, in hamsters on lithogenic diet, 928
5-Hydroxytryptamine organelles of blood platelets, mepacrine for investigating by fluorescence microscopy, 200
Hyperargininemia (arginase deficiency), simple screening test for, 876
Hyperbetalipoproteinemia, human, abnormalities of cholesterol-phospholipid composition in platelets and low-density lipoproteins in, 341
Hyperchylomicronemia, familial, oxyhemoglobin dissociation curve in, 573
Hyperlipidemia, combined therapy of, colestipol, clofibrate, and phytosterols in, 354
Hyperoxia, extracellular fluid, depressant influence on liver slice oxygen uptake, 1269
Hypertensive strain of Wistar rats developed from previously normotensive but labile normals, 1163
Hyperthermia, effects on hypoxic ventilatory response in normal man, 564
Hypertransfused sheep, erythropoietic inhibitory activity of plasma fractions from, 93
Hyperviscosity syndrome, IgA myeloma proteins isolated from sera of patients with, 919
Hypoparathyroidism and pseudohypoparathyroidism, renal excretion of phosphate in, effects of acetazolamide on, 1188
Hypotonic exchange-loading of erythrocytes, 30
Hypoxanthine derivative of 9-β-D-arabinofuranosyladenine, inhibitory and lethal concentrations against herpes simplex virus, type 1, 687
Hypoxic chamber, simple, 1375
ventilatory response in normal man, effects of hyperthermia on, 564

I

^{131}I-fibrinogen, autologous, in dog, labeled by chloramine-T method, physiologic and biologic behavior of, 1105
^{125}I-labeled fibrinogen scan correlated with plasma fibrinogen chromatography for fibrinogen catabolism in surgery patient and with postoperative venous thrombosis, 1349
IgA myeloma proteins isolated from sera of patients with hyperviscosity syndrome, 919
IgG receptor, monocyte, activity, dynamics, and modulation in normal persons and patients with granulomatous diseases, 332
Ileal receptor for intrinsic factor–vitamin B_{12} complex in rat, solubilization of, 172
Immune affinity chromatography for extraction and purification of specific antibody against *Pseudomonas aeruginosa*, 433
precipitate of fibrinogen for measuring fibrin monomer, 653
Immunofluorescence assays, living cell, for detecting antitumor antibodies in human breast cancer sera, 257
fixed cell, for detecting antitumor antibodies in human breast cancer sera, 257

Immunofluorescence—Cont'd
indirect, on acetone-fixed lymphocytes for detecting antilymphocyte antibodies in systemic lupus erythematosus, 240
Immunofluorescent detection, indirect, of antibodies against thermophilic actinomycetes in hypersensitivity pneumonitis, 533
Immunologic assay, indirect, of specific enzyme activity, problems of, 446
studies in pneumococcal disease, 1198
In vitro measurement of bleeding time, 1306
Indirect immunofluorescence on acetone-fixed lymphocytes for detecting antilymphocyte antibodies in systemic lupus erythematosus, 240
immunofluorescent detection of antibodies against thermophilic actinomycetes in hypersensitivity pneumonitis, 533
immunologic assay of specific enzyme activity, problems of, 446
Indium-111–labeled leukocytes for localization of abscesses, compared with gallium-67 citrate in dogs, 217
Infants, normal, predominance of lymphocytes in bone marrow cells of, 1225
Inhibition of vitamin B_{12} binding to transcobalamin II at low pH, 13
Insulin-deprived alloxan-diabetic dogs, gastric glucagon hypersecretion in, 971
Interferon, quantitative semimicro, semiautomated colorimetric assay for, 1036
Intestinal mucosa, folate deficiency of, effect on jejunal transport in rat, 1002
Intracortical distribution of renal blood flow, effects of volume expansion and parathyroid hormone on, 959
Intraportal vs. subcutaneous insulin administration, effect on adenylate energy charge of liver in diabetic rats, 937
Intrarenal and systemic hemodynamics, relationship in cirrhosis, 1175
Intravenous fluids, endotoxin in, improved in vitro pyrogen test to detect picograms of using *Limulus* amoebocyte assay, 910
Intrinsic factor–vitamin B_{12} complex in rat, solubilization of ileal receptor for, 172
Iodinated (directly) estriol radioligand for radioimmunoassay of serum unconjugated estriol, 1125
Iodination by human polymorphonuclear leukocytes re-evaluated, 675
Iodine monochloride compared with modified chloramine-T radioiodination for in vivo protein studies, 836
Iron absorption, intestinal, uptake of radioiron by erythroid precursors during, 51

J

Jansky-Bielschowsky type of neuronal ceroid-lipofuscinosis, leukocyte peroxidase deficiency in, 770
Jaundice, neonatal, in premature rhesus monkeys, hemoperfusion through albumin-conjugated agarose gel for treating, 101
Jejunal transport in rat, effect of folate deficiency of intestinal mucosa on, 1002

K

Kidney excretion of albumin, effects of volume expansion on, 25
function and structure in rat, effect of concomitant mercuric chloride and gentamicin on, 622
Kidney—Cont'd
human, diabetic and nondiabetic, size and weight of glomeruli from, 544
rat, sodium reabsorption in, effect of pharmacologic doses of vasopressin on, 987
Kinetic characterization of hemostasis in thermal injury, 702
studies of tumor-induced leukemoid reaction in mice, 80
Kininogen-prekallikrein–factor XII system and normal plasma arginine esterase in cystic fibrosis, 131

L

Labile normotensive normal Wistar rats, development of hypertensive strain from, 1163
Lactate, blood, cyanide-induced increases of, interaction with ethyl methylene blue, 632
Lead poisoning, screening for, fluorometric assay of protoporphyrin in erythrocytes as, 659
portable hematofluorometer for determining zinc protophyrin level in blood as, 712
Lecithin:cholesterol acyltransferase, plasma, activated during alimentary lipemia, 524
Leukemoid reaction in mice, tumor-induced, kinetic studies of, 80
Leukocytes, indium-111–labeled, for localization of abscesses, compared with gallium-67 citrate in dogs, 217
losses from hemoperfusion through uncoated charcoal, albumin-agarose gel, and neutral and cation exchange resins, elimination of, by calcium chelating agents and prostaglandin E_1, 110
peroxidase deficiency in neuronal ceroid-lipofuscinosis (Jansky-Bielschowsky type), 770
polymorphonuclear human, re-evaluation of iodination by, 675
inhibition of some functions of, by in vitro zinc, 135
Leukotaxis in human serum, cell-directed inhibitor of, 190
Limulus amoebocyte lysate for improved in vitro pyrogen test to detect picograms of endotoxin contamination in intravenous fluids, 910
lysate assay for biological activities of tritiated endotoxin, correlated with rabbit pyrogen and complement-activation assays for endotoxin, 308
Lipase, lipoprotein, activity, validation of stable emulsion for assay of, 666
Lipemia, alimentary, activation of plasma lecithin:cholesterol acyltransferase during, 524
Lipid absorption in rat, effect of synthetic diether phospholipid on, 147
Lipoproteins, automated microdensitometry and quantification by agarose gel electrophoresis, 1341
lipase activity, validation of stable emulsion for assay of, 666
low-density, abnormalities of cholesterol-phospholipid composition in human hyperbetalipoproteinemia, 341
Lithium-induced renal tubular acidosis, 455
Lithogenic diet, hamsters on, hepatic 3-hydroxy-3-methylglutaryl CoA reductase activity in, 928
Liver, adenylate energy charge of, in diabetic rats, subcutaneous and intraportal insulin administration compared, 937
as primary site of erythropoietin formation in fetus, 640
rat, isolated perfused, effect of *E. coli* endotoxin on canalicular formation in, 471
slice oxygen uptake, depressant influence of extracellular fluid hyperoxia on, 1269

Liver—Cont'd
uroporphyrinogen III cosynthetase in, in Dubin-Johnson syndrome, 517
Low-density lipoproteins, abnormalities of cholesterol-phospholipid composition in human hyperbetalipoproteinemia, 341
Lupus erythematosus, systemic; *see* Systemic lupus erythematosus
Lymphocytes, predominance in bone marrow cells of normal infants, 1225
Lymphoma, human monocyte glucose metabolism in, 316
Lymphoproliferative responses to antigens mediated by human pulmonary alveolar macrophages, 1326

M

Macrophages, human pulmonary alveolar, mediating lymphoproliferative responses to antigens, 1326
system, alveolar, influence of acute exposure to cigarette smoke on, 1215
Man, normal, effects of hyperthermia on hypoxic ventilatory response in, 564
and uremic, red cell survival in, ^{14}C cyanate as tag for, 823
Marrow-ablated mice, ^{89}Sr, hemopoietic stem cell dynamics in, 592
Men and women, serum and plasma of, transcobalamins I, II, and III separately measured in normal ranges of, 1145
Meningitis, *E. coli*, experimental, comparison of four aminoglycoside antibiotics in therapy of, 692
Mepacrine for investigating 5-hydroxytryptamine organelles of blood platelets by fluorescence microscopy, 200
Mercuric chloride and gentamicin, concomitant, effect on kidney function and structure in rat, 622
Metabolism, purine, enzymes of, simple micro-assay methods for, 1135
Methicillin, nafcillin, and oxacillin compared in therapy of *Staphylococcus aureus* endocarditis in rabbits, 1262
Methylprednisolone, effects on physical properties of human red cell, 1241
Microdensitometry and quantification of lipoproteins, automated, by agarose gel electrophoresis, 1341
β_2-Microglobulin in rat, catabolism of, 1208
Microscopy, fluorescence, mepacrine for investigating 5-hydroxytryptamine organelles of blood platelets by, 200
Mineralocorticoid receptors, renal, interaction with 16 β-hydroxydehydroepiandrosterone, 250
Mitogenic response, dissociation from tissue factor generation by human mononuclear cells, 792
Monkey, rhesus, neonatal jaundice in premature, hemoperfusion through albumin-conjugated agarose gel for treating, 101
Monocyte, human, glucose metabolism in lymphoma, 316
IgG receptor activity, dynamics, and modulation in normal persons and patients with granulomatous diseases, 332
Mononuclear cells, human, tissue factor generation by, effects of endotoxin on and dissociation from mitogenic response, 792
Monosodium urate monohydrate, calcium pyrophosphate dihydrate, and silicon dioxide crystals, protein binding to. I. Physical characteristics, 1314
Mouse (mice), marrow of, effect of bacterial endotoxin on erythroid precursors (CFU-E and ERC) of, 278
Mouse—Cont'd
colony-forming cells from, dissimilarity of in vitro and erythrocyte-enhanced, 829
osteosclerotic, marrow regeneration in, trauma as stimulus to, 804
^{89}Sr marrow-ablated, hemopoietic stem cell dynamics in, 592
tumor-induced leukemoid reaction in, kinetic studies of, 80
Muscle water and electrolytes in uremia and effects of hemodialysis, 322
Mycobacterium tuberculosis, clinical isolates of, sensitivity to chemotherapeutic agents, rapid radiometric method for determining, 861
Myeloma, multiple, human, plasma cell antigens in, 1009
proteins, IgA, isolated from sera of patients with hyperviscosity syndrome, 919
Myelopoiesis in infected burn, 540

N

Nafcillin, methicillin, and oxacillin compared in therapy of *Staphylococcus aureus* endocarditis in rabbits, 1262
Natriuresis, blunted, of saline infusion in dogs with chronic bile duct obstruction, renal vasodilatation in, 1053
Neuraminidase, decreased surface charge and accelerated senescence of red blood cells after treatment with, 581
Neuronal ceroid-lipofuscinosis, leukocyte peroxidase deficiency in Jansky-Bielschowsky type, 770
Neutral proteases of human granulocytes. IV. Interaction between human granulocyte collagenase and plasma protease inhibitors, 269
Neutrophils, human polymorphonuclear, phagocytic and chemiluminescence responses to, 153
New editors for the JOURNAL, 8
New faculty: recruit pursuit, 9
Nitrogen metabolism in mild obesity, effect of protein-sparing diet and brief fast on, 1030
Normotensive but labile normal Wistar rats, development of hypertensive strain from, 1163

O

Obesity, mild, nitrogen metabolism in, effect of protein-sparing diet and brief fast on, 1030
Organelles, 5-hydroxytryptamine, of blood platelets, mepacrine for investigating by fluorescence microscopy, 200
Osmotic fragility, quantitative, and disease states, 409
Osteosclerotic mouse, marrow regeneration in, trauma as stimulus to, 804
Oxacillin, methicillin, and nafcillin compared in therapy of *Staphylococcus aureus* endocarditis in rabbits, 1262
Oxygen radicals, multiple, evidence for generation from effect of sodium azide on chemiluminescence of granulocytes, 1333
uptake, liver slice, depressant influence of extracellular fluid hyperoxia on, 1269
Oxyhemoglobin dissociation curve in familial hyperchylomicronemia, 573

P

Parathyroid hormone and volume expansion, effects on total renal blood flow and its intracortical distribution, 959
Pathology, gross, in human atherosclerosis, computer densitometry for angiographic assessment of, 378
Pco_2, urine, mechanism of elevation by neutral phosphate infusion, 946

Peroxidase, leukocyte, deficiency in neuronal ceroid-lipofuscinosis (Jansky-Bielschowsky type), 770
pH, internal CO_2 trap used to stabilize, for prolonged maintenance of 2,3-DPG in liquid blood storage, 498
Phagocytic and chemiluminescence responses to human polymorphonuclear neutrophils, 153
Phagocytosis and calcium pyrophosphate dihydrate crystal–induced chemotactic factor, 817
Phosphate depletion, effect on renal tubular reabsorption of glucose, 554
  neutral, infusion of, mechanism by which elevates urine Pco_2, 946
  renal excretion of, in hypoparathyroidism and pseudohypoparathyroidism, effects of acetazolamide on, 1188
Phospholipid-cholesterol, abnormal composition in platelets and low-density lipoproteins of human hyperbetalipoproteinemia, 341
Phytosterols, colestipol, and clofibrate in combined therapy of hyperlipidemia, 354
Plasma arginine esterase, normal, and factor XII–prekallikrein-kininogen system in cystic fibrosis, 131
  catecholamines, improved fluorimetric assay vs. enzymatic method, 421
  cell antigens in human multiple myeloma, 1009
  cortisol, false elevation in congenital adrenal hyperplasia, 735
fibrinogen chromatographic findings correlated with ^{125}I-labeled fibrinogen scan findings for fibrinogen catabolism in surgery patient and postoperative venous thrombosis, 1349
  fractions from hypertransfused sheep, erythropoietic inhibitory activity of, 93
  lecithin:cholesterol acyltransferase, regulation of. IV. Activation during alimentary lipemia, 524
  protease inhibitors, interaction with human granulocyte collagenase, 269
  and serum of men and women, transcobalamins I, II, and III separately measured in normal ranges of, 1145
  transferrin, portal vein, uptake of radioiron from, by erythroid precursors during intestinal iron absorption, 51
  vasoactive intestinal polypeptide, radioimmunoassay of, 1379
Plasminogen, proactivator and activator levels in plasma as measured by caseinolysis, 1153
Plasticizer leached from polyvinyl chloride in chronic transfusion therapy, effect on subhuman primate, 1066
Platelets, abnormalities of cholesterol-phospholipid composition in human hyperbetalipoproteinemia, 341
  factor 3 immunoinjury, rapid test for antiplatelet antibody, 400
  5-hydroxytryptamine organelles of, mepacrine for investigating by fluorescence microscopy, 200
  losses from hemoperfusion through uncoated charcoal, albumin-agarose gel, and neutral and cation exchange resins, elimination of, by calcium chelating agents and prostaglandin E_1, 100
  prostaglandin synthesis, effects of sulfinpyrazone on, 868
  release of serotonin, effects of sulfinpyrazone on, 868
  responsiveness to aggregation, collagen or epinephrine potentiation of, 603
  retention by acrylonitrile co-polymer dialysis membranes, role of heparin in, 724
Pneumococcal disease, immunologic studies in, 1198
Pneumonitis, hypersensitivity, indirect immunofluorescent detection of antibodies against thermophilic actinomycetes in, 533
Polymorphonuclear leukocytes, human, re-evaluation of iodination by, 675
  inhibition of some functions of, by in vitro zinc, 135
  neutrophils, human, phagocytic and chemiluminescence responses to, 153
Polypeptide, vasoactive intestinal, radioimmunoassay in plasma, 1379
Polyvinyl chloride, plasticizer leached from, in chronic transfusion therapy, effect on subhuman primate, 1066
Porcine and human ristocetin-Willebrand factor, purification of, 1278
Portal vein plasma transferrin, uptake of radioiron from, by erythroid precursors, during intestinal iron absorption, 51
Prekallikrein-kininogen–factor XII system and normal plasma arginine esterase in cystic fibrosis, 131
Primate, subhuman, effects of plasticizer leached from polyvinyl chloride in chronic transfusion therapy on, 1066
Proactivator and activator levels of plasminogen in plasma as measured by caseinolysis, 1153
Propranolol, effect on normal human erythrocytes, 41
Prostaglandin E_1 and calcium chelating agents for eliminating platelet and white blood cell losses from hemoperfusion through uncoated charcoal, albumin-agarose gel, and neutral and cation exchange resins, 110
  platelet synthesis of, effects of sulfinpyrazone on, 868
Proteases, neutral, of human granulocytes. IV. Interaction between human granulocyte collagenase and plasma protease inhibitors, 269
  plasma, inhibitors, interaction with human granulocyte collagenase, 269
Protein binding to monosodium urate monohydrate, calcium pyrophosphate dihydrate, and silicon dioxide crystals. I. Physical characteristics, 1314
  serum, human, of cephalosporin antibiotics in vitro, 414
  dietary content in rat, alterations in enterokinase, trypsin, and alkaline phosphatase from variation in, 72
  -sparing diet and brief fast, effect on nitrogen metabolism in mild obesity, 1030
  studies, in vivo, iodine monochloride compared with modified chloramine-T radioiodination for, 836
  synthesis, glomerular, in proteinuric rats, 262
  role of, in calcium pyrophosphate dihydrate crystal–induced chemotactic factor, 817
Protoporphyrin in erythrocytes, fluorometric assay of, as screening test for lead poisoning, 659
  zinc, erythrocyte, quantitative determination of, 881
  level in blood determined by portable hematofluorometer as screening device for lead poisoning, 712
Pseudohypoparathyroidism and hypoparathyroidism, renal excretion of phosphate in, effects of acetazolamide on, 1188
Pseudomonas aeruginosa, specific antibody against, extraction and purification by immune affinity chromatography, 433
Purine metabolism, enzymes of, simple micro-assay methods for, 1135
Pyrogen test, in vitro, improved, to detect picograms of endotoxin contamination in intravenous fluids using *Limulus* amoebocyte lysate, 910

Q

Quantitation of circulating transcobalamin II and R binders in inhibition of vitamin B_{12} binding to transcobalamin II at low pH, 13
Quantitative osmotic fragility and disease states, 409
relationships of fourth complement component in human cerebrospinal fluid, 615

R

Rabbit pyrogen and complement-activation assays for endotoxin correlated with *Limulus* lysate assay for biological activities of tritiated endotoxins, 308
Staphylococcus aureus endocarditis in, methicillin, nafcillin, and oxacillin compared in therapy of, 1262
Radiation injury, exogenous and endogenous hematopoietic repopulation after, 229
Radioimmunoassay, serum transcobalamin II, 645
unconjugated estriol with directly iodinated estriol radioligand, 1125
steroid, radioiodinated derivatives for, 902
vasoactive intestinal polypeptide in plasma, 1379
Radioimmunological method for determining renal renin activity in rat, 1112
Radioiodinated derivatives for steroid radioimminoassay, 902
Radioiodination, chloramine-T, modified, compared with iodine monochloride for in vivo protein studies, 836
Radiometric method, rapid, for determining sensitivity of clinical isolates of *Mycobacterium tuberculosis* to chemotherapeutic agents, 861
Radioiron, selective uptake of, by erythroid precursors, from portal vein plasma transferrin during intestinal iron absorption, 51
Rat, bile salt–nondependent fraction of canalicular bile water in, 393
catabolism of β_2-microglobulin in, 1208
diabetic, subcutaneous vs. intraportal insulin administration and adenylate energy charge of liver, 937
dietary protein content in, alterations in enterokinase, trypsin, and alkaline phosphatase from variations in, 72
1,25-dihydroxycholecalciferol production in, effect of decreased renal function with and without decreased renal mass, 1168
ileal reptor for intrinsic factor–vitamin B_{12} complex in, solubilization of, 172
isolated perfused liver of, effect of *E. coli* endotoxin on canalicular formation in, 471
jejunal transport in, effect of folate deficiency of intestinal mucosa on, 1002
kidney, sodium reabsorption in, effect of pharmacologic doses of vasopressin on, 987
function and structure of, effect of concomitant mercuric chloride and gentamicin on, 622
lipid absorption in, effect of synthetic diether phospholipid on, 147
proteinuric, glomerular protein synthesis in, 262
renal renin activity in, radioimmunological method for determining, 1112
urine acidification in, effect of amphotericin B, in pathogenesis of distal renal tubular acidosis, 463
Wistar development of a hypertensive strain from previously normotensive but labile normals, 1163
Recruit pursuit, new faculty and, 9
Red cells; *see* Erythrocytes
Renal blood flow, total, and its intracortical distribution, effects of volume expansion and parathyroid hormone on, 959
excretion of phosphate in hypoparathyroidism and pseudohypoparathyroidism, effects of acetazolamide on, 1188
function, decreased with and without reduction in renal mass, effect, on 1,25-dihydroxycholecaliferol production in rats, 1168
mass, reduction in, decreased renal function with and without, effect on 1,25-dihydroxycholecalciferol production in rats, 1168
mineralocorticoid receptors, interaction with 16β-hydroxydehydroepiandrosterone, 250
renin activity in rat, radioimmunological method for determining, 1112
tubular acidosis, distal, effect of amphotericin B on urine acidification as pathogenesis of, 463
lithium-induced, 455
reabsorption of glucose, effect of phosphate depletion on, 554
vasodilatation in blunted natriuresis of saline infusion in dogs with chronic bile duct obstruction, 1053
Renin renal activity in rat, radioimmunological method for determining, 1112
effect of calcium gluconate infusion on, in dog, 181
Reovirus-like agent in diarrheal stools, reliable identification of, 560
Reserve bilirubin binding capacity, simplified micromethod for assay of, 439
Rheological evaluation of hemoglobin S and hemoglobin C hemoglobinopathies, 488
Ristocetin-Willebrand factor and factor VIII coagulant activity molecule, interaction between, 1295
porcine and human, purification of, 1278

S

Screen filtration pressure, low, maintained in blood stored in BAGPM, 504
Senescence, accelerated, and decreased surface charge of red blood cells after neuraminidase treatment, 581
Sensitivity of clinical isolates of *Mycobacterium tuberculosis* to chemotherapeutic agents, rapid radiometric method for determining, 861
Serotonin, platelet release of, effects of sulfinpyrazone on, 868
Serum component related to secondary amyloidosis, immunochemical studies on, 1092
human, cell-directed inhibitor of leukotaxis in, 190
and plasma of men and women, transcobalamins I, II, and III separately measured in normal ranges of, 1145
protein binding, human, of cephalosporin antibiotics in vitro, 414
transcobalamin II, radioimmunoassay for, 645
unconjugated estriol, radioimmunoassay with directly iodinated estriol radioligand, 1125
Sheep, hypertransfused, erythropoietic inhibitory activity of plasma fractions from, 93
Sickle cell anemia, red cell calcium content and transmembrane calcium movements in, 1365
Silicon dioxide cyrstals, monosodium urate monohydrate, and calcium pyrophosphate dihydrate, protein binding to. I. Physical characteristics, 1314
Simple hypoxic chamber, 1375
Sjögren's syndrome, cryoglobulinemia in, and factors of cryoprecipitation, 483

Sodium azide, effect on chemiluminescence of granulocytes providing evidence for generation of multiple oxygen radicals, 1333
reabsorption in rat kidney, effect of pharmacologic doses of vasopressin on, 987
retention during acute constriction of vena cava not stimulated by decreased cardiac output, 809
Solubilization of ileal receptor for intrinsic factor–vitamin B_{12} complex in rat, 172
^{89}Sr marrow-ablated mice, hemopoietic stem cell dynamics in, 592
Stable tracer glucose-1-^{13}C, estimation of glucose turnover with, 285
Staphylococcus aureus endocarditis in rabbits, methicillin, nafcillin, and oxacillin compared in therapy of, 1262
Stem cell, hemopoietic, dynamics in ^{89}Sr marrow-ablated mice, 592
Steroid radioimmunoassay, radioiodinated derivates for, 902
Stools, diarrheal, reovirus-like agent in, reliable identification of, 560
Streptococcal sera, type-specific anti-M, prepared by immunization with acid-hydrolyzed cells, 1120
Streptokinase and heparin therapy evaluated by quantitative venographic assessment of deep vein thrombosis, 1018
Stroma-free hemoglobin prepared by crystallization, characteristics of, 509
Subcellular localization of calcium pyrophosphate dihydrate crystal-induced chemotactic factor, 817
Subcutaneous vs. intraportal insulin administration, effect on adenylate energy charge of liver in diabetic rats, 937
Sulfinpyrazone, effects on platelet prostaglandin synthesis and platelet release of serotonin, 868
Surface charge, decreased, and accelerated senescence of red blood cells after neuraminidase treatment, 581
Synovial fluids, activation of complement components C3 and factor B in, 160
Systemic and intrarenal hemodynamics, relationship in cirrhosis, 1175
lupus erythematosus, antilymphocyte antibodies detected in, by indirect immunofluorescence on acetone-fixed lymphocytes, 240

T

Thermal injury, hemostasis in, kinetics of, 702
Thrombocytopenias, immunologic, drug-induced, and neonatal, antiplatelet antibody detected in, 400
Thrombosis, deep vein, quantitative assessment of, in evaluating streptokinase and heparin therapy, 1018
Tissue distribution of indium-111–labeled leukocytes for localization of abscesses in dogs, 217
factor generation by human mononuclear cells, effects of endotoxin on and dissociation from mitogenic response, 792
Transcobalamins I, II, and III, separately measured in normal ranges in serum and plasma in men and women, 1145
II, inhibition of vitamin B_{12} binding to, at low pH, 13
serum, radioimmunoassay for, 645
Transfusion therapy, chronic, plasticizer leached from polyvinyl chloride in, effect on subhuman primate, 1066
Trauma as stimulus to marrow regeneration in osteosclerotic mouse, 804
Trypsin, alterations in, from variation in dietary protein content in rat, 72
Tumor-induced leukemoid reaction in mice, kinetic studies of, 80

U

Uptake of radioiron by erythroid precursors from portal vein plasma transferrin during intestinal iron absorption, 51
Uremia, muscle water and electrolytes in, and effects of hemodialysis, 322
Uremic and normal man, red cell survival in, ^{14}C cyanate as tag for, 823
Urinary fibrin-fibrinogen–related antigen in glomerulonephritis, origin of, 1043
Urine acidification in rats, effect of amphotericin B, in pathogenesis of distal renal tubular acidosis, 463
Pco_2, mechanism of elevation by neutral phosphate infusion, 946
saturation of brushite and calcium oxalate in, comparison of three methods for estimating, 891
Uroporphyrinogen III cosynthetase in liver and blood in Dubin-Johnson syndrome, 517

V

Vasoactive intestinal popypeptide, radioimmunoassay in plasma, 1379
Vasodilatation, renal, in blunted natriuresis of saline infusion in dogs with chronic bile duct obstruction, 1053
Vasopressin, pharmacologic doses of, effect on sodium reabsorption in rat kidney, 987
Vein, deep, thrombosis of, quantitative venographic assessment of, in evaluating streptokinase and heparin therapy, 1018
Vena cava, acute constriction of, sodium retention during, not stimulated by decreased cardiac output, 809
Venographic assessment, quantitative, of deep vein thrombosis in evaluating streptokinase and heparin therapy, 1018
Venous thrombosis, fibrinogen catabolism in, correlation of findings by plasma chromatography and ^{125}I-labeled scan, 1349
Ventilatory response, hypoxic, in normal man, effects of hyperthermia on, 564
Vitamin B_{12}–intrinsic factor complex in rat, solubilization of ileal receptor for, 172
Volume expansion effects on albumin excretion by kidney, 25

W

White blood cell; *see* Leukocyte
Women and men, serum and plasma of, transcobalamins I, II, and III separately measured in normal ranges of, 1145
receiving oral contraceptive drugs, fibrin formation and dissolution in, 751

Z

Zinc, in vitro, inhibiting some functions of polymorphonuclear leukocytes, 135
protoporphyrin, erythrocyte, quantitative determination of, 881
level in blood determined by portable hematofluorometer as screening device for lead poisoning, 712

Subject Index*

A

A23, 187, collagen, or thrombin inducing platelet shape change, aggregation, and release, 707
Absorption and distribution of lead and cadmium in rats, effects of iron deficiency on, 700
Acidosis, metabolic, acute, tubular effects in rat, 318
Actinomycetes, thermophilic, proteins and proteases in, comparative electrophoresis of, 1076
Adenine nucleotide and mitochondrial metabolism of kidney of burned rats and relation to insulin, 457
  in thrombin-degranulated platelets, effect of prolonged circulation in vivo, 490
Adenosine deaminase deficiency, primary immunodeficiencies associated with, screening for, 844
Adsorption of human erythrocyte surface glycoprotein onto polystyrene latex spheres, 324
Agar, humoral factors stimulating granulopoiesis compared in, to diffusion chambers, 883
Age-dependent separation of erythrocytes by preparative electrophoresis, 744
  and posture-related changes in plasma protein binding and aldosterone metabolism in essential and secondary hypertension, 475
Aggregation of fixed washed platelets and platelet-aggregating factor, 512
  platelet, induced by collagen, thrombin, or A23,187, 707
  and secretion of platelets, lumi-aggregometer for measuring simultaneously, 125
Aldosterone metabolism in essential and secondary hypertension, age- and posture-related changes in, 475
Alkaline phosphatase levels, leukocyte, in multiple myeloma, 114
Alkylureas and nitrogen mustards, effects on kinetics of red cell sickling, 863
Aluminum absorption from gastrointestinal tract and bone deposition after aluminum carbonate ingestion with normal renal function, 810
Alveolar macrophages, rabbit, microsomes from, cytochrome P-450 and mixed-function oxidation by, 101
Amine, vasoactive, antagonists for treatment of autologous immune complex glomerulonephritis, 638
Aminonucleoside, effect on transport maximum of para-aminohippurate and intrarenal blood flow distribution in rats, 341
Aminopyrine, disposition in liver disease or anticonvulsant drug therapy, diazepam breath test for, 440
Anemia, hemolytic, drug-induced, with mild glucose-6-phosphate dehydrogenase deficiency in Gd Castilla, 754
  in rats with Walker 256 carcinosarcoma, pathogenesis of, 502
Anemia—Cont'd
  sex-linked, ferritin distribution and synthesis in, 68
  sickle cell; *see* Sickle cell anemia
Anergic patients with chemotactic inhibitory activity, increased activity of serum inhibitors of mouse bone marrow colony formation in, 195
Animal model of spontaneous syncope and sudden death, 592
Antibody response to group A streptococci in epidemic of streptococcal pharyngitis, 466
Anticoagulant, sodium fluoride, effect on measurement of transcobalamins in plasma and serum, 949
Anticonvulsant drug therapy, disposition of aminopyrine, antipyrine, diazepam, and indocyanine green in, diazepam breath test for, 440
Antidiuretic hormone–induced antidiuresis, effect on water reabsorption by superficial loop of Henle in Brattleboro rats, 1004
Antigen, hepatitis B surface, detection in potentially contaminated human plasma and plasma fractions, 1107
  mycobacterial, immunoabsorbents used for purification of, 354
Anti-inflammatory and immunosuppressive drugs, effect on monocyte function in vitro, 569
Antipyrine, disposition in liver disease or anticonvulsant drug therapy, diazepam breath test for, 440
Antithrombin activity after fatty meal in normal subjects, familial hyperlipidemia, and nephrotic syndrome, 529
Arrhythmias, cardiac, neural mechanisms in, 589
Arterial thrombosis, experimental, depression of collateral blood flow after, and serotonin, 645
Artery, cerebral, potassium loading for enhancement of potassium transfer to intracellular fluid, 1035
Autologous heat-treated red cells, sequestration in spleen, 666
  immune complex glomerulonephritis, treated with vasoactive amine antagonists, 638
Azaribine toxicity and high-resolution chromatography, 771
  treatment of psoriasis, neurotoxicity from, studied with high-pressure liquid chromatography, 773

B

Bacteria killing by guinea pig neutrophils and monocytes compared, 273
Bacterial overgrowth, ^{13}C-labeled glycocholate breath test for, 431
Bactericidal capability of neutrophils from patients and carriers of chronic granulomatous disease, 522
Bile acid kinetics and steroid balance during nicotinic acid therapy in hyperlipoproteinemia types II and IV, 613

*July, pp. 1-226; August, pp. 227-404; September, pp. 405-588; October, pp. 589-770; November, pp. 771-950; December, pp. 951-1132.

Bile—Cont'd
saturated, estrogen-induced, in hamster, 963
Blacks and whites, normotensive, differing responses to sodium in, 555
Blood cells, human peripheral, in vitro production of prostaglandin by, 1043
flow, collateral, after experimental arterial thrombosis, depression of, and serotonin, 645
distribution intrarenal, in rats, effect of aminonucleoside on, 341
gentamicin concentrations in end-stage renal disease, 389
mercaptans, improved method for measuring, 849
platelet migration, factors influencing, 37
pressure monitoring, digital, in critical care and dialysis patients, 57
Bone deposition of aluminum after ingestion of aluminum carbonate with normal renal function, 810
Breath hydrogen for quantitating a small bowel transit time after partial gastrectomy, 30
simple gas chromatographic technique for measuring, 856
test, ^{13}C-labeled glycocholate, for bacterial overgrowth and ileal dysfunction, 431
CO_2, for clinical diagnosis, ^{13}C in, 412
^{13}C-trioctanoin, for fat malabsorption, 422
diazepam, for disposition of aminopyrine, antipyrine, diazepam, and indocyanine green in liver disease or anticonvulsant drug therapy, 440
with isotopes of carbon, 405

C

^{13}C in CO_2 breath tests, clinical diagnosis with, 412
-labeled glycocholate breath test for bacterial overgrowth and ileal dysfunction, 431
-trioctanoin breath test for fat malabsorption, 422
C-peptide suppression test for insulinoma, 180
Cadmium and lead, effects of iron deficiency on absorption and distribution in rats, 700
Calcium, platelet, in human gel-filtered platelets, response to secretory agents, 873
sodium, magnesium, and phosphate, excretion of, interrelationship in polycystic kidney disease, 1066
Cancer, lung, lymphocyte mitogen stimulation for evaluating prognosis after preirradiation therapy, 295
Carbon dioxide breath tests, ^{13}C in, clinical diagnosis with, 412
isotopes, breath test with, 405
Carcinosarcoma, Walker 256, anemia in rats with, pathogenesis of, 502
Cardiac arrhythmias, neural mechanisms in, 589
Carriers of chronic granulomatous disease, bactericidal capability of neutrophils from, 522
Catecholamines, conjugated, hydrolysis of, new method, 680
plasma, liquid chromatographic radioenzymatic assay for, 604
Cellular transport of chloramphenicol and thiamphenicol, 347
Cerebral artery potassium loading for enhancement of potassium transfer to intracellular fluid, 1035
Chemotactic inhibitory activity in anergic patients, increased activity of serum inhibitors of mouse bone marrow colony formation in, 195
response, neutrophil, tetracycline evaluated in, 259
Chemotherapy of experimental streptococcal endocarditis. VI. Prevention of enterococcal endocarditis, 171
Chloramphenicol and thiamphenicol, cellular transport of, 347
Cholesterol, whole-body metabolism in cholesterol-fed African green monkeys with variable hypercholesterolemic response, 1021
Chromatography, gas, simple technique for measuring breath hydrogen, 856
high-pressue liquid, for neurotoxicity in psoriasis treated with azaribine, 773
for specific determination of quinidine and (3S)-3-hydroxyquinidine in human serum, 816
high-resolution, and azaribine toxicity, 771
liquid, radioenzymatic, assay for plasma catecholamines, 604
Chronic granulomatous disease, patients and carriers, bactericidal capability of neutrophils from, 522
obstructive lung disease, plasma vasopressin and renin-angiotensin-aldosterone system in, 373
Clinical diagnosis with ^{13}C in CO_2 breath tests, 412
Clofibrate, effects on lipid synthesis, storage, and plasma Intralipid clearance, 823
CO_2; *see* Carbon dioxide
Collagen, thrombin, or A23, 187 inducing platelet shape change, aggregation, and release, 707
Collateral blood flow after experimental arterial thrombosis, depression of, and serotonin, 645
Complement, pleural fluid, and complement conversion in immunologic and nonimmunologic diseases, 971
Congenital hypothyroidism, regionalized screening for, TSH filter paper method, 11
Conjugated catecholamines, hydrolysis of, new method, 680
Corticosteroid therapy, chronic, serum 25-hydroxyvitamin D in patients receiving, 399
Cyclic AMP and cyclic GMP levels in rat fetal liver cells, effect of erythropoietic preparations, 162
Cytochrome P-450 content and mixed-function oxidation by microsomes from rabbit alveolar macrophages, 101
turnover of, effect of ethinyl estradiol on, 1096

D

Dialysis patients, digital blood pressure monitoring in, 57
Diazepam breath test for disposition of aminopyrine, antipyrine, diazepam, and indocyanine green in liver disease or anticonvulsant drug therapy, 440
Differential index in disease, serum amylase isoenzyme profiles as, 1
Diffusion chamber cultures, hemopoietic stem cells maintained in, 581
humoral factors stimulating granulopoiesis in, compared to agar, 883
Digital blood pressure monitoring in critical care and dialysis patients, 57
1,25-Dihydroxyvitamin D, serum, increased in idiopathic hypercalciuria, 955
Direct potentiometry of sodium and potassium in human plasma and electrolyte interaction with nonprotein, protein-associated substance(s), 654
Distribution and absorption of lead and cadmium in rats, effects of iron deficiency on, 700
Double-isotope study on incorporation of platelets and erythrocytes into fibrin, 130
technique, urinary, for detecting fat malabsorption, 394

Drug elimination, correlations of aminopyrine, antipyrine, diazepam, and indocyanine green in liver disease and anticonvulsant drug therapy, 440
-resistant and drug-sensitive malaria, host heme catabolism in, 767

E

Eck-fistula rats, defect in uric acid metabolism in, 92
Elastin in developing human lung parenchymal tissues of normal infants and those with respiratory distress syndrome, 981
Electrophoresis, preparative, age-dependent separation of erythrocytes by, 744
Electrophoretic variation in partial deficiency of hypoxanthine-guanine phosphoribosyltransferase, 25
Electrolyte interaction with nonprotein, protein-associated substance(s) and direct potentiometry of sodium and potassium in human plasma, 654
Ellagic acid–activated normal plasma, rapid loss of factors XII and XI activity in, role of plasma inhibitors and implications for automated activated partial thromboplastin time recording, 1054
Embolism, pulmonary, experimental, increased heparin clearance in, 204
Endocarditis, enterococcal, prevention of, 171
streptococcal, chemotherapy of. VI. Prevention of enterococcal endocarditis, 171
Enterococcal endocarditis, prevention of, 171
Erythrocytes, age-dependent separation of, by preparative electrophoresis, 744
heat-treated autologous, sequestration in spleen, 666
irreversibly sickled, suppression by zinc therapy in sickle cell anemia, 549
neuraminidase- and protease-modified, IgG anti-D saline hemagglutination of, immunological and electron microscopic analysis of, 929
osmotic fragility, micromethod based on resistive-particle counting, 914
and platelets, incorporation into fibrin, double-isotope study, 130
pyruvate kinase, aberrant, liver pyruvate kinase from patient with, 1012
sickling, effects of alkylureas and nitrogen mustards on kinetics of, 863
surface glycoprotein, human, adsorption onto polystyrene latex spheres, 324
Erythropoietic preparations, effect on cyclic AMP and cyclic GMP levels in rat fetal liver cells, 162
Estrogen-induced saturated bile in hamster, 963
suppression of surgically induced vascular intimal hyperplasia in rabbits, 77
Ethanol effect on intestinal (Na, K) ATPase and intestinal thiamine transport in rats, 1086
Ethinyl estradiol, effects on hepatic microsomal proteins and turnover of cytochrome P-450, 1096
Extracellular fluid volume, sodium excretion during expansion of, effect of prostaglandin inhibition on, 46

F

Factor XII and XI activity in ellagic acid–activated normal plasma, rapid loss of, role of plasma inhibitors and implications for automated activated partial thromboplastin time recording, 1054
Familial hyperlipidemia, antithrombin activity after fatty meal in, 529
Fat malabsorption, ^{13}C-trioctanoin breath test for, 422
urinary double-isotope technique for detecting, 394
Fatty meal, antithrombin activity after, in normal subjects, familial hyperlipidemia, and nephrotic syndrome, 529
^{59}Fe labeled rice-based meals, isotopic exchange in, 231
Ferritin distribution and synthesis in sex-linked anemia, 68
Fibrin, incorporation of platelets and erythrocytes into, double-isotope study, 130
Fibrinogen heterogeneity and fibrinolytic activity, abnormal, in advanced liver disease, 187
Fibrinolysis, higher molecular weight products of, biological behavior of, 216
Fibrinolytic activity and fibrinogen heterogeneity, abnormal, in advanced liver disease, 187

G

Gas chromatographic technique, simple, for measuring breath hydrogen, 856
Gastrectomy, partial, small bowel transit time after, breath hydrogen for quantitating, 30
Gastrointestinal tract, aluminum absorption from, and bone deposition after aluminum carbonate ingestion with normal renal function, 810
Gd(−) Castilla, glucose-6-phosphate dehydrogenase variant, showing mild deficiency with drug-induced hemolytic anemia, 754
Gel-filtered human platelets, secretion by, response of platelet Ca^{2+}, Mg^{2+}, and K^+ to secretory agents, 873
Gentamicin concentrations in blood, urine, and renal tissue in end-stage renal disease, 389
Glomerulonephritis, autologous immune complex, treated with vasoactive amine antagonists, 638
diffuse proliferative, relationship of levels of circulating immune complexes to histologic patterns of nephritis in, 891
Glomerulonephropathy, membranous, relationship of levels of circulating immune complexes to histologic patterns of nephritis in, 891
Glomerulus in acute renal failure, 227
Glucose-6-phosphate dehydrogenase variant GD(−) Castilla, showing mild deficiency with drug-induced hemolytic anemia, 754
Glycocholate, ^{13}C-labeled, breath test for bacterial overgrowth and ileal dysfunction, 431
Glycoprotein, surface, human erythrocyte, adsorption onto polystyrene latex spheres, 324
Gonadectomy retarding spontaneous hypertension in SH rats, 997
Granulocyte dysfunction, postsurgical, in healthy kidney donors, 720
Granulopoiesis, humoral factors stimulating, compared in agar in vitro and in diffusion chambers, 883
Guanidinosuccinic acid levels, serum and urinary, in normal and uremic subjects, 303
Guinea pig neutrophils and monocytes, bacteria killing compared, 273

H

Hamster, estrogen-induced saturated bile in, 963
Hb; *see* Hemoglobin
Heat-treated autologous red cells, sequestration in spleen, 666
Hemagglutination, IgG anti-D saline, of neuraminidase- and protease-modified red cells, immunological and electron microscopic analysis of, 929
Heme catabolism, host, in drug-sensitive and drug-resistant malaria, 767

Hemodialysis patients with and without bilateral nephrectomy, plasma renin activity and prostaglandin concentration in, effects of ultrafiltration on, 904
Hemoglobin Alberta, isoelectric focusing studies of "stable" asymmetrical hybrid formed with, 623
$G_{San\ Jose}$ (β7 glu→gly), compared with Hb S, 837
variant, hemoglobin Alberta, isoelectric focusing studies of "stable" asymmetrical hybrid formed with, 623
Hemolysis and lesions, hepatic, after 3α,7α,12α-trihydroxy-5β-cholestan-26-oyl taurine in rats, 536
Hemopoietic stem cells maintained in diffusion chamber cultures, 581
Heparin clearance, increased, in experimental pulmonary embolism, 204
Hepatic lesions and hemolysis after 3α,7α,12α-trihydroxy-5β-cholestan-26-oyl taurine in rats, 536
microsomal proteins, effects of ethinyl estradiol on, 1096
Hepatitis B surface antigen, detection in potentially contaminated human plasma and plasma fractions, 1107
Heterozygotes and homozygotes with methylenetetrahydrofolate reductase deficiency, detection of, 283
Heymann nephritis of rats, beneficial effect of methysergide, 796
High-pressure liquid chromatography for neurotoxicity in psoriasis treated with azaribine, 773
for specific determination of quinidine and (3S)-3-hydroxyquinidine in human serum, 816
-resolution chromatography and azaribine toxicity, 771
Higher molecular weight products of fibrinolysis, biological behavior of, 216
Histologic patterns of nephritis, relationship to levels of circulating immune complexes in membranous glomerulonephropathy and diffuse proliferative glomerulonephritis, 891
Homozygotes and heterozygotes with methylenetetrahydrofolate reductase deficiency, detection of, 283
Host heme catabolism in drug-sensitive and drug-resistant malaria, 767
Human erythrocyte surface glycoprotein, adsorption onto polystyrene latex spheres, 324
lung parenchymal tissues of normal infants and with respiratory distress syndrome, elastin in, 981
monocytes, microfilament and microtubule function in, 737
normal lead intake from respiration, 238
plasma renin activity during sodium restriction, effects of potassium chloride on, 312
peripheral blood cells, in vitro production of prostaglandin by, 1043
plasma clearance of pyridoxal 5′-phosphate increased in vitamin B_6 deficiency and uremia, 632
direct potentiometry of sodium and potassium in, and electrolyte interaction with nonprotein, protein-associated substance(s), 654
and plasma fractions, potentially contaminated, detection of hepatitis B surface antigen in, 1107
platelets, gel-filtered, secretion by, response of platelet Ca^{2+}, Mg^{2+}, and K^+ to secretory agents, 873
renal handling of endogenous lysozyme, 61
serum, specific determination of quinidine and (3S)-3-hydroxyquinidine in, by high-pressure liquid chromatography, 816
Human serum—Cont'd
and tissue isoamylases, isoelectric focusing studies, 141
Humoral factors stimulating granulopoiesis compared in agar in vitro and in diffusion chambers, 883
Hydrogen, breath; *see* Breath hydrogen
Hydrolysis of conjugated catecholamines, new method, 680
Hydroxyproline metabolism in Paget's disease, effect of mithramycin on, 803
(3S)-3-Hydroxyquinidine and quinidine in human serum, specific determination by high-pressure liquid chromatography, 816
25-Hydroxyvitamin D, serum, in patients receiving chronic corticosteroid therapy, 399
Hypercalciuria, idiopathic, 951
serum 1,25-dihydroxyvitamin D increased in, 955
Hypercholesterolemic response, variable, in cholesterol-fed African green monkeys, whole-body metabolism in, 1021
Hyperlipoproteinemia types II and IV, bile acid kinetics and steroid balance during nicotinic acid therapy in, 613
Hypertension, essential and secondary, age- and posture-related changes in plasma protein binding and aldosterone metabolism in, 475
spontaneous, retarded in SH rats by gonadectomy, 997
Hypothyroidism, congenital, regionalized screening for, TSH filter paper method, 11
Hypouricemia in disease, different mechanisms, 153
Hypoxanthine-guanine phosphoribosyltransferase, electrophoretic variation in partial deficiency of, 25

I

Idiopathic hypercalciuria, 951
serum 1,25-dihydroxyvitamin D increased in, 955
IgG anti-D saline hemagglutination of neuraminidase- and protease-modified red cells, immunological and electron microscopic analysis of, 929
-coated latex particles, kinetic studies of phagocytosis of, with thrombocyte counter, 786
Ileal dysfunction, ^{13}C-labeled glycocholate breath test for, 431
Immune complexes, circulating, levels of, relationship to histologic patterns of nephritis in membranous glomerulonephropathy and diffuse proliferative glomerulonephritis, 891
in immunologic and nonimmunologic diseases, 971
Immunoabsorbents used for purification of mycobacterial antigens, 354
Immunodeficiencies, primary, associated with purine nucleoside phosphorylase or adenosine deaminase deficiencies, screening for, 844
Immunofluorescence, membrane, detection of platelet isoantibodies by, 4
Immunological and electron microscopic analysis of IgG anti-D saline hemagglutination of neuraminidase- and protease-modified red cells, 929
and nonimmunologic diseases, pleural fluid complement, complement conversion, and immune complexes in, 971
and pharmacologic respiratory responses, immediate-type, in rhesus monkey, effect of PGE_1, 18
Immunosuppressive and anti-inflammatory drugs, effect on monocyte function in vitro, 569
In vitro evaluation of monocyte leukotaxis, improved method for, 381

Indocyanine green, disposition in liver disease or anticonvulsant drug therapy, diazepam breath test for, 440
Infants, human, normal and with respiratory distress syndrome, elastin in developing lung parenchymal tissues of, 981
Infrared screening method, rapid, inexpensive, for elevated serum triglycerides, 109
Insulin, relation to adenine nucleotide and mitochondrial metabolism of kidney of burned rats, 457
serum, radioreceptor assay for, 686
Insulinoma, C-peptide suppression test for, 180
Intestinal absorption of α-tocopherol in unanesthetized rat, influence of luminal constituents on process of, 85
(Na, K) ATPase and thiamine transport in rats, effect of ethanol, 1086
Intimal hyperplasia, vascular, surgically induced, in rabbits, estrogen suppression of, 77
Intracellular fluid, potassium transfer to, enhancement by cerebral artery potassium loading, 1035
Intralipid, plasma, clearance of, effects of clofibrate on, 823
Intrarenal blood flow distribution in rats, effect of aminonucleoside on, 341
Iron deficiency effects on absorption and distribution of lead and cadmium in rats, 700
Isoamylases, serum and tissue, human, isoelectric focusing studies, 141
Isoantibodies, platelet, detected by membrane immunofluorescence, 4
Isoelectric focusing for human serum and tissue isoamylases, 141
for "stable" asymmetrical hybrid formed with new hemoglobin variant, hemoglobin Alberta, 623
Isoenzyme, serum amylase, profiles as differential index in disease, 1
Isotopes of carbon, breath test with, 405
Isotopic exchange in ^{59}Fe labeled rice-based meals, 231

K

Kidney of burned rats, adenine nucleotide and mitochondrial metabolism of, and relation to insulin, 457
disease, polycystic, excretion of sodium, calcium, magnesium, and phosphate in, interrelationship between 1066
donors, healthy, postsurgical granulocyte dysfunction in, 720
stones, idiopathic hypercalciuria, 951
superficial loop of Henle, water reabsorption by, in Brattleboro rats, effect of antidiuretic hormone–induced antidiuresis on, 1004

L

Latex particles, IgG-coated, phagocytosis of, kinetic studies with thrombocyte counter, 786
spheres, polystyrene, adsorption of human erythrocyte surface glycoprotein onto, 324
Lead and cadmium, effects of iron deficiency on absorption and distribution in rats, 700
intake from respiration in normal man, 238
Leukocyte alkaline phosphatase levels in multiple myeloma, 114
mechanical trauma in, 728
polymorphonuclear, phagocytosis, RNA metabolism in, 118
Leukotaxis, monocyte, in vitro evaluation of, improved method for, 381
Lipid synthesis and storage, effects of clofibrate on, 823
Liquid chromatographic radioenzymatic assay for plasma catecholamines, 604
Liver cells, rat, fetal, effect of erythropoietic preparations on cyclic AMP and cyclic GMP levels in, 162
disease, advanced, abnormal fibrinogen heterogeneity and fibrinolytic activity in, 187
disposition of aminopyrine, antipyrine, diazepam, and indocyanine green in, diazepam breath test for, 440
pyruvate kinase from patient with PK Nagasaki, 1012
Lumi-aggregometer, new instrument for simultaneously measuring secretion and aggregation of platelets, 125
Luminal constituents influencing intestinal absorptive process of α-tocopherol in unanesthetized rat, 85
Lung cancer, lymphocyte mitogen stimulation for evaluating prognosis after preirradiation therapy, 295
parenchymal tissues, developing, in normal human infants and those with respiratory distress syndrome, elastin in, 981
Lymphocyte mitogen stimulation studies in lung cancer for evaluating prognosis after preirradiation therapy, 295
Lysozyme, endogenous, renal handling of, in man, 61

M

Magnesium, platelet, in human gel-filtered platelets, response to secretory agents, 873
sodium, calcium, and phospate, excretion of, interrelationship in polycystic kidney disease, 1066
Malaria, drug-sensitive and drug-resistant, host heme catabolism in, 767
Man; *see* Human
Mechanical trauma in leukocytes, 728
Membrane immunofluorescence, detection of platelet isoantibodies by, 4
Membranous glomerulonephropathy, relationship of levels of circulating immune complexes to histologic patterns of nephritis in, 891
Mercaptans, blood, improved method for measuring, 849
Mercuric chloride–induced acute renal failure, pathophysiology of, 330
Metabolis acidosis, acute, tubular effects in rat, 318
Methyl mercury, chronic exposure to, renal porphyrinuria during, 266
Methylenetetrahydrofolate reductase deficiency, homozygotes and heterozygotes with detection of, 283
Methysergide, beneficial effect on Heymann nephritis of rats, 796
Microfilament and microtubule function in human monocytes, 737
Microgranulocytotoxicity, 249
Microsomes from rabbit alveolar macrophages, cytochrome P-450 content and mixed-function oxidation by, 101
Microtubule and microfilament function in human monocytes, 737
Migration, platelet, factors influencing, 37
Mithramycin, effect on hydroxyproline metabolism in Paget's disease, 803
Mitochondrial and adenine nucleotide metabolism of kidney of burned rats and relation to insulin, 457
Mitogen stimulation of lymphocytes for evaluating prognosis in lung cancer after perirradiation therapy, 295
Monkeys, African green, cholesterol-fed with variable hypercholesterolemic response, whole-body cholesterol metabolism in, 1021

Monkeys—Cont'd
rhesus, immediate-type immunologic and pharmacologic responses in, effect of PGE_1, 18
Monocyte function, effect of immunosuppressive and anti-inflammatory drugs in vitro, 569
human, microfilament and microtubule function in, 737
leukotaxis, in vitro evaluation of, improved method for, 381
and neutrophils, guinea pig, bacteria killing compared, 273
Mouse bone marrow colony formation, serum inhibitors of, increased activity in anergic patients with chemotactic inhibitory activity, 195
Mycobacterial antigens, immunoabsorbents used for purification of, 354
Myeloma, multiple, leukocyte alkaline phosphatase levels in, 114
serum lysozyme in, 899
Myeloperoxidase interference with estimation of superoxide dismutase activity, 289

N

(Na, K) ATPase, intestinal, in rats, effect of ethanol on, 1086
Nephrectomy, bilateral, hemodialysis patients with and without, plasma renin activity and prostaglandin concentration in, effects of ultrafiltration on, 904
Nephritis, Heymann, of rats, beneficial effect of methysergide, 796
histologic patterns of, relationship to levels of circulating immune complexes in membranous glomerulonephropathy and diffuse proliferative glomerulonephritis, 891
Nephrotic syndrome, antithrombin activity after fatty meal in, 529
Neural mechanisms in cardiac arrhythmias, 589
Neuraminidase-modified red cells, IgG anti-D saline hemagglutination of, immunological and electron microscopic analysis of, 929
Neurotoxicity in psoriasis with azaribine treatment, studied by high-pressure liquid chromatography, 773
Neutrophil chemotactic response, tetracycline evaluated in, 259
and monocytes, guinea pig, bacteria killing compared, 273
from patients and carriers of chronic granulomatous disease, bactericidal capability of, 522
Nicotinic acid therapy for hyperlipoproteinemia types II and IV, bile acid kinetics and steroid balance during, 613
Nitrogen mustards and alkylureas, effects on kinetics of red cell sickling, 863
Nonprotein, protein-associated substance(s), electrolyte interaction with, and direct potentiometry of sodium and potassium in human plasma, 654

O

Osmotic fragility, erythrocyte, micromethod based on resistive-particle counting, 914
Oxidation, mixed-function, and cytochrome P-450 content, microsomes from rabbit alveolar macrophages, 101

P

Paget's disease, hydroxyproline metabolism in, effect of mithramycin on, 803
Para-aminohippurate transport maximum in rats, effect of aminonucleoside on, 341
Partial thromboplastin time, activated, automated recording, implications in rapid loss of factors XII and XI activity in ellagic acid–activated normal plasma, 1054
Pathogenesis of anemia in rats with Walker 256 carcinosarcoma, 502
Pathophysiology of mercuric chloride–induced acute renal failure, 330
PGE_1; *see* Prostaglandin E_1
Phagocytosis of IgG-coated latex particles, kinetic studies with thrombocyte counter, 786
polymorphonuclear leukocyte, RNA metabolism in, 118
Pharmacologic and immunologic immediate-type respiratory responses in rhesus monkey, effect of PGE_1, 18
Pharyngitis, streptococcal, antibody response to group A streptococci in epidemic of, 466
Phosphate, sodium, calcium, and magnesium, excretion of, interrelationship in polycystic kidney disease, 1066
Phosphoribosyltransferase, hypoxanthine-guanine, electrophoretic variation in partial deficiency of, 25
PK Nagasaki, liver pyruvate kinase from patient with, 1012
Plasma catecholamines, liquid chromatographic radioenzymatic assay for, 604
clearance, increased, of pyridoxal 5'-phosphate in vitamin B_6–deficient uremic man, 632
Intralipid, effects of clofibrate on, 823
fractions, human, potentially contaminated, detection of hepatitis B surface antigen in, 1107
human, direct potentiometry of sodium and potassium in, and electrolyte interaction with nonprotein, protein-associated substance(s), 654
potentially contaminated, detection of hepatitis B surface antigen in, 1107
inhibitors of factors XII and XI, role in rapid loss of activity in ellagin acid–activated normal plasma, 1054
protein binding in essential and secondary hypertension, age- and posture-related changes in, 475
renin activity, peripheral, effects of ultrafiltration in hemodialysis patients with and without bilateral nephrectomy, 904
during sodium restriction in normal man, effects of potassium chloride on, 312
transcobalamins in, effect of sodium fluoride anticoagulant on measurement of, 949
vasopressin and renin-angiotensin-aldosterone system in chronic obstructive lung disease, 373
Platelet-aggregating factor and aggregation of fixed washed platelets, 512
aggregation and secretion of, lumi-aggregometer for measuring simultaneously, 125
Ca^{2+}, Mg^{2+}, and K^+, response to secretory agents in human gel-filtered platelets, 873
and erythrocytes, incorporation into fibrin, double-isotope study, 130
fixed washed, aggregation of, and platelet-aggregating factor, 512
human gel-filtered, secretion by, response of platelet Ca^{2+}, Mg^{2+}, and K^+ to secretory agents, 873
isoantibodies detected by membrane immunofluorescence, 4
migration, factors influencing, 37
shape change, aggregation, and release induced by collagen, thrombin, or A23,187, 707
thrombin-degranulated, adenine nucleotides in, effect of prolonged circulation in vivo, 490

Pleural fluid complement, complement conversion, and immune complexes in immunologic and nonimmunologic diseases, 971
Polycystic kidney disease, excretion of sodium, calcium, magnesium, and phosphate in, interrelationship between, 1066
Polymorphonuclear leukocyte phagocytosis, RNA metabolism in, 118
Polystyrene latex spheres, adsorption of human erythrocyte surface glycoprotein onto, 324
Porphyrinuria, renal, during chronic methyl mercury exposure, 266
Postsurgical granulocyte dysfunction in healthy kidney donors, 720
Posture-related changes in plasma protein binding and aldosterone metabolism in essential and secondary hypertension, 475
Potassium chloride, effects on plasma renin activity during sodium restriction in normal man, 312
on response to sodium restriction in normal subjects and chronic renal failure patients, 361
platelet, in human gel-filtered platelets, response to secretory agents, 873
and sodium in human plasma, direct potentiometry of and electrolyte interaction with nonprotein, protein-associated substance(s), 654
transfer to intracellular fluid, enhancement by cerebral artery potassium loading, 1035
Potentiometry, direct, of sodium and potassium in human plasma and electrolyte interaction with nonprotein, protein-associated substance(s), 654
Preirradiation therapy for lung cancer, prognosis after, evaluated by lymphocyte mitogen stimulation, 295
Prostaglandin concentration, effects of ultrafiltration in hemodialysis patients with and without bilateral nephrectomy, 904
E_1, effect on immediate-type immunologic and pharmacologic respiratory responses in rhesus monkey, 18
inhibition, effect on sodium excretion during expansion of extracellular fluid volume, 46
production by human peripheral blood cells in vitro, 1043
Protease-modified red cells, IgG anti-D saline hemagglutination of, immunological and electron microscopic analysis of, 929
and proteins in thermophilic actinomycetes, comparative electrophoresis of, 1076
Protein-associated, nonprotein substance(s), electrolyte interaction with, and direct potentiometry of sodium and potassium in human plasma, 654
and proteases in thermophilic actinomycetes, comparative electrophoresis of, 1076
Psoriasis treated with azaribine, neurotoxicity in, studied by high-pressure liquid chromatography, 773
Pulmonary embolism, experimental, increased heparin clearance in, 204
Purine nucleoside phosphorylase deficiency, primary immunodeficiencies associated with, screening for, 844
Pyridoxal 5'-phosphate, increased plasma clearance in vitamin B_6–deficient uremic man, 632
Pyrimidine-5'-nucleotidase, simple and rapid radiometric assay for, 563
Pyruvate kinase, liver, from patient with aberrant erythrocyte pyruvate kinase, PK Nagasaki, 1012

Q

Quinidine and (3S)-3-hydroxyquinidine in human serum, specific determination by high-pressure liquid chromatography, 816

R

Rabbit alveolar macrophages, microsomes from, cytochrome P-450 content and mixed-function oxidation by, 101
surgically induced vascular intimal hyperplasia in, estrogen suppression of, 77
Radioenzymatic liquid chromatographic assay for plasma catecholamines, 604
Radiometric assay, simple and rapid, for pyrimidine-5'-nucleotidase, 563
Radioreceptor assay for serum insulin, 686
Rats, absorption and distribution of lead and cadmium in, effects of iron deficiency on, 700
aminonucleoside effect on transport maximum of para-aminohippurate and intrarenal blood flow distribution in, 341
Brattleboro, water reabsorption by superficial loop of Henle in, effect of antidiuretic hormone–induced antidiuresis on, 1004
burned, adenine nucleotide and mitochondrial metabolism of kidney of, and relation to insulin, 457
Eck-fistula, defect in uric acid metabolism in, 92
fetal liver cells, effect of erythropoietin preparations on cyclic AMP and cyclic GMP levels in, 162
hepatic lesions and hemolysis after 3α,7α,12α-trihydroxy-5β-cholestan-26-oyl taurine, 536
Heymann nephritis in, beneficial effect of methysergide, 796
intestinal (Na, K) ATPase and thiamine transport in, effect of ethanol on, 1086
SH, spontaneous hypertension in, retarded by gonadectomy, 997
tubular effects of acute metabolic acidosis in, 318
unanesthetized, intestinal absorption of α-tocopherol in, influence of luminal constituents on process of, 85
Red blood cells; *see* Erythrocytes
Regionalized screening for congenital hypothyroidism, 11
Renal disease, end-stage, gentamicin concentrations in blood, urine, and renal tissue in, 389
failure, acute, glomerulus in, 227
mercuric chloride–induced, pathophysiology of, 330
chronic, response to sodium restriction in patients with, effects of potassium chloride on, 361
function, normal, aluminum absorption from gastrointestinal tract and bone deposition after aluminum carbonate ingestion with, 810
handling of endogenous lysozyme in man, 61
porphyrinuria during chronic methyl mercury exposure, 266
tissue, gentamicin concentrations in end-stage renal disease, 389
Renin-angiotensin-aldosterone system and plasma vasopressin in chronic obstructive lung disease, 373
Resistive-particle counting, micromethod based on, for erythrocyte osmotic fragility, 914
Respiration, lead intake from, in normal man, 238
Respiratory distress syndrome, infants with, elastin in developing lung parenchymal tissues of, 981

Respiratory—Cont'd
responses, immediate-type immunologic and pharmacologic, in rhesus monkey, effect of PGE_1, 18
Rice-based meals, ^{59}Fe labeled, isotopic exchange in, 231
RNA metabolism in polymorphonuclear leukocyte phagocytosis, 118

S

Secretion and aggregation of platelets, lumi-aggregometer for measuring simultaneously, 125
by gel-filtered human platelets, response of platelet Ca^{2+}, Mg^{2+}, and K^+ to secretory agents, 873
Secretory agents, response of platelet Ca^{2+}, Mg^{2+}, and K^+ in human gel-filtered platelets to, 873
Sequestration of heat-treated autologous red cells in spleen, 666
Serotonin and depression of collateral blood flow after experimental arterial thrombosis, 645
Serum amylase isoenzyme profiles as differential index in disease, 1
1,25-dihydroxyvitamin D increased in idiopathic hypercalciuria, 955
25-hydroxyvitamin D concentrations in patients receiving chronic corticosteroid therapy, 399
inhibitors of mouse bone marrow colony formation, increased activity in anergic patients with chemotactic inhibitory activity, 195
insulin, radioreceptor assay for, 686
lysozyme in multiple myeloma, 899
quinidine and (3S)-3-hydroxyquinidine in, specific determination by high-pressure liquid chromatography, 816
and tissue isoamylases, human, isoelectric focusing studies, 141
transcobalamins in, effect of sodium fluoride anticoagulant on measurement of, 949
triglycerides, rapid and inexpensive infrared screening method for, 109
urate levels, changes in sex trends between ages 10 and 14, 990
and urinary guanidinosuccinic acid levels in normal and uremic subjects, 303
Sex-linked anemia, ferritin distribution and synthesis in, 68
trends of serum urate levels, changes between ages 10 and 14, 990
Sickle cell anemia, suppression of irreversibly sickled erythrocytes by zinc therapy in, 549
Sickling, red cell, effects of alkylureas and nitrogen mustards on kinetics of, 863
Small bowel transit time, after partial gastrectomy, breath hydrogen for quantitating, 30
Sodium, calcium, magnesium, and phosphate, excretion of, interrelationship in polycystic kidney disease, 1066
excretion during expansion of extracellular fluid volume, effect of prostaglandin inhibition on, 46
fluoride anticoagulant, effect on measurement of transcobalamins in plasma and serum, 949
and potassium in human plasma, direct potentiometry of, and electrolyte interaction with nonprotein, protein-associated substance(s), 654
response differences in normotensive whites and blacks, 555
restriction, plasma renin activity in normal man during, effects of potassium chloride on, 312
Sodium restriction—Cont'd
response to, in normal subjects and chronic renal failure patients, effects of potassium chloride on, 381
Spleen, sequestration of heat-treated autologous red cells in, 666
Spontaneous hypertension retarded in SH rats by gonadectomy, 997
syncope and sudden death, animal model of, 592
Stem cells, hemopoietic, maintained in diffusion chamber cultures, 581
Steroid balance and bile acid kinetics during nicotinic acid therapy in hyperlipoproteinemia types II and IV, 613
Streptococcal endocarditis, chemotherapy of. VI. Prevention of enterococcal endocarditis, 171
pharyngitis epidemic, antibody response to group A streptococci in, 466
Streptococci, group A, antibody response to, in epidemic of streptococcal pharyngitis, 466
Sudden death and spontaneous syncope, animal model of, 592
Superoxide dismutase activity, estimation of, interference by myeloperoxidase, 289
Syncope, spontaneous, and sudden death, animal model of, 592

T

Tetracycline evaluated in neutrophil chemotactic response, 259
Thermophilic actinomycetes, proteins and proteases in, comparative electrophoresis of, 1076
Thiamine transport, intestinal, in rats, effect of ethanol on, 1086
Thiamphenicol and chloramphenicol, cellular transport of, 347
Thrombin, collagen, or A23,187 inducing platelet shape change, aggregation, and release, 707
-degranulated platelets, adenine nucleotides in, effect of prolonged circulation in vivo, 490
Thrombocyte counter for kinetic studies of phagocytosis of IgG-coated latex particles, 786
Thrombosis, arterial, experimental, depression of collateral blood flow after, and serotonin, 645
Tissue and serum isoamylases, human, isoelectric focusing studies, 141
α-Tocopherol, intestinal absorption in unanesthetized rat, influence of luminal constituents on process of, 85
Transcobalamins in plasma and serum, effect of sodium fluoride anticoagulant on, 949
Transit time, small bowel, after partial gastrectomy, breath hydrogen for quantitating, 30
Trauma, mechanical, in leukocytes, 728
Triglycerides, serum, rapid and inexpensive infrared screening method for, 109
3α,7α,12α-Trihydroxy-5β-cholestan-26-oyl taurine, hepatic lesions and hemolysis after administration to rats, 536
TSH filter paper method for regionalized screening for congenital hypothyroidism, 11
Tubular effects of acute metabolic acidosis in rat, 318

U

Ultrafiltration effects on peripheral plasma renin activity and prostaglandin concentration in hemodialysis patients with and without bilateral nephrectomy, 904
Urate levels, serum, changes in sex trends between ages 10 and 14, 990

Uremia, acute, impaired vitamin D metabolism in, 760
Uremic and normal subjects, serum and urinary guanidinosuccinic acid levels in, 303
vitamin B_6–deficient man, increased plasma clearance of pyridoxal 5′-phosphate in, 632
Uric acid metabolism, defect in Eck-fistula rats, 92
Urinary double-isotope technique for detecting fat malabsorption, 394
and serum guanidinosuccinic acid levels in normal and uremic subjects, 303
Urine, gentamicin concentrations in end-stage renal disease, 389

V

Vascular intimal hyperplasia in rabbits, surgically induced, estrogen suppression of, 77
Vasoactive amine antagonists for treatment of autologous immune complex glomerulonephritis, 638
Vasopressin, plasma, and renin-angiotensin-aldosterone system in chronic obstructive lung disease, 373
Vitamin B_6–deficient uremic man, increased plasma clearance of pyridoxal 5′-phosphate in, 632
D metabolism, impaired, in acute uremia, 760

W

Walker 256 carcinosarcoma, anemia in rats with, pathogenesis of, 502
Water reabsorption by superficial loop of Henle in Brattleboro rats, effect of antidiuretic hormone–induced antidiuresis on, 1004
Whites and blacks, normotensive, differing responses to sodium in, 555
Whole-body cholesterol metabolism in cholesterol-fed African green monkeys with variable hypercholesterolemic response, 1021

Z

Zinc therapy suppressing irreversibly sickled erythrocytes in sickle cell anemia, 549
